

These are precaution procedure for appointments:

When you come, please wear a mask and wait at the waiting room until we say you can come into the treatment room. Before entering the treatment room, please remove your shoes and put them on the shoe rack. We will take your temperature and give you hand sanitizer immediately when you enter the room.

We sanitize the rest room and other area periodically, but other people are sharing those areas. The alcohol bottles are on the waiting table and in the rest room. We suggest you wipe the area before where you might touch if you use the rest room.

We have no water/tea service, and no blanket at this time. If you think you may be cold during the session, please bring your own warm clothing. Wearing soft and thin material pants is ideal for treatments of lower extremities

In order to simplify and not asking each time, could you please remember these 3 questions for each session?

- 1) Are you fully vaccinated for COVID?
- 2) Have you had any cold/flu like symptoms last 2 weeks?
- 3) Have you contacted COVID patients or person who has similar symptoms recently?

If your answers yes for 1) and no for 2) and 3), please come for appointment on time.

If your answers, no for 1), please tell us why. If the answers, yes for 2) and 3), please contact us before you come, we may have to cancel the appointment.
